

VIKASH KUMAR

Full-Stack .NET Developer | ASP.NET Core | ASP.NET MVC | Web API | Microservices | SQL Server
+91 7766040877 | byvikashk@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#) | [LeetCode](#) | [Namaste Dev](#)

PROFESSIONAL SUMMARY

Full-Stack .NET Developer with 2+ years of experience in designing, developing, and maintaining enterprise web applications using C#, ASP.NET MVC, ASP.NET Core, Web API, ADO.NET, Entity Framework Core, SQL Server, and JavaScript. Experienced in developing scalable RESTful APIs, implementing authentication and authorization, building reporting and document generation solutions, integrating cloud services, and optimizing application performance. Strong understanding of the Software Development Life Cycle (SDLC), Agile methodologies, database design, debugging, and writing clean, maintainable, and production-ready code.

TECHNICAL SKILLS

Programming Languages: C, C#, SQL

.NET Technologies: .NET Framework, ASP.NET MVC, ASP.NET Core MVC, ASP.NET Core, Web API, ADO.NET, Entity Framework Core (EF Core)

Frontend Technologies: HTML5, CSS3, Bootstrap, JavaScript, jQuery, AJAX, Responsive Web Design

Database Technologies: Microsoft SQL Server, PostgreSQL, Stored Procedures, Views, Functions, Triggers

Cloud & Messaging: Google Cloud Platform (GCP), Google Cloud Storage (GCS), Kafka, RabbitMQ

Authentication & Security: JWT Authentication, Role-Based Access Control (RBAC), OAuth 2.0, Secure Coding Practices

Development Tools: Visual Studio 2022, Visual Studio Code, Git, GitHub, GitLab, Postman, Swagger, JIRA

Software Engineering: RESTful API Development, Repository Pattern, Dependency Injection, SDLC, Exception Handling, Debugging, Code Reviews, Performance Optimization

PROFESSIONAL EXPERIENCE

Software Developer

Sep 2025 – Present

Senwell Group Private Limited, Pune

- Migrated legacy ASP.NET MVC applications to ASP.NET Core Web API, improving maintainability while preserving existing business workflows.
- Developed and maintained an Email Service API supporting ARS, SRS, NTS, AAD, and MRM approval workflows with dynamic email templates.
- Designed and implemented RESTful APIs for report generation and data export in PDF, XLS, XLSX, CSV, and ODS formats using Playwright and NPOI.
- Integrated Google Cloud Platform (GCS, Cloud Functions, and Service Account authentication) for secure file storage, document generation, and email processing.
- Contributed to Azure-to-Google Cloud Platform migration by replacing Azure Blob Storage, Event Hub, Azure AD, and IoT Hub with GCS, Apache Kafka, Forge IAM, and RabbitMQ.
- Supported Google Kubernetes Engine (GKE) deployments, performed integration, regression, and end-to-end testing, and resolved security vulnerabilities identified by Black Duck.
- Developed and enhanced scalable .NET backend services and RESTful APIs by implementing new features, resolving defects, and optimizing application performance.
- Optimized SQL queries and backend processes to improve application performance, reliability, and maintainability across enterprise modules.
- Collaborated with business analysts, QA engineers, and developers in Agile environments to deliver sprint requirements, troubleshoot production issues, and ensure seamless system integration.

- Developed and maintained enterprise web applications using C#, ASP.NET MVC, ADO.NET, SQL Server, HTML5, CSS3, JavaScript, jQuery, and AJAX.
- Designed and implemented backend business logic, database operations, and application enhancements to improve system performance and maintainability.
- Developed responsive and interactive user interfaces using HTML5, CSS3, JavaScript, jQuery, and AJAX to enhance user experience.
- Created and optimized SQL queries, stored procedures, and database operations for efficient data processing and application performance.
- Assisted in application deployment, IIS configuration, and production support activities, ensuring reliable application availability and smooth production releases.
- Investigated and resolved production issues, fixed bugs, and implemented new features based on business requirements.
- Collaborated with business analysts, QA engineers, and developers in an Agile environment to deliver high-quality software solutions within sprint timelines.

PROJECTS

Employee Management System

[GitHub](#)

- Developed a web-based Employee Management System using ASP.NET MVC, C#, ADO.NET, and SQL Server.
- Implemented complete CRUD operations for employee records with input validation and database integration.
- Designed responsive user interfaces using HTML5, CSS3, Bootstrap, JavaScript, and jQuery.
- Developed SQL Server stored procedures and optimized database operations for efficient data management.
- Followed the MVC architecture to build a scalable and maintainable application.
- Implemented role-based authentication and authorization for secure user access.

Smart File Organizer (File Arranger Software)

[GitHub](#)

- Developed a desktop application using Python and MySQL to automatically organize files based on their extensions into dedicated folders.
- Implemented file management functionalities using Tkinter, OS Module, Shutil, and Subprocess to automate file classification and directory operations.
- Designed an intuitive graphical user interface (GUI) to simplify file organization and improve user experience.
- Reduced manual effort by automatically categorizing documents, images, videos, and other file types into structured directories.
- Applied modular programming principles to develop a maintainable and scalable desktop application.

EDUCATION

- **Master of Technology (M.Tech) in Computer Science & Engineering** *July 2022 – June 2024*
CGPA: **7.73**
Sagar Institute of Research & Technology-Excellence, Bhopal, Madhya Pradesh
- **Bachelor of Technology (B.Tech) in Computer Science & Engineering** *July 2018 – June 2022*
CGPA: **8.27**
Sagar Institute of Research & Technology-Excellence, Bhopal, Madhya Pradesh

CERTIFICATIONS & TRAINING

- **Full-Stack .NET Development (5-Month Corporate Training)**
Naresh i Technologies, Hyderabad
